

EMAUX FILTER ELEMENT

SKU- FCE25E, FCE50E, FCE75E, FCE100E, FCE150E, FCE200E

The **Emaux Filter Element** is a critical component of Emaux filtration systems, designed for efficient water filtration in swimming pools, spas, aquariums, and industrial water treatment applications. These elements trap dirt, debris, and impurities, ensuring clean and clear water.

Product Features:

- **High-Quality Filtration:**
 - Designed to capture fine particles, providing superior water clarity.
 - Ensures efficient removal of contaminants such as dirt, sand, and organic matter.
- **Durable Construction:**
 - Made from robust materials such as polyester or high-strength plastics.
 - Resistant to wear, chemicals, and corrosion.
- **Easy Maintenance:**
 - Simple to clean and replace, reducing downtime.
- **Compatibility:**
 - Fits seamlessly into Emaux filtration systems.
 - Available in various sizes and configurations to suit different models and requirements.
- **Energy Efficiency:**
 - Optimized flow design minimizes pressure loss, reducing energy consumption.
- **Cartridge Filters:** Rinse regularly with clean water and replace every 6-12 months, depending on usage.
