

PONDOMATIC POND VACUUM

SKU: PPMV

The Pondomatic Pond Vacuum is a 1400-watt power against sludge, leaves and algae in ponds or pools. The compact sludge vacuum reliably and powerfully removes debris particles that have sunk to the pond floor. Up to a height of 2 m these particles are conveyed into the integrated 30 l sludge tank, which can subsequently be emptied!

Product Features:

- Extremely high suction power of 1400 watt
- Maximum suction height of 2 m
- The compact pond vacuum reliably and powerfully removes debris that have sunk to the pond floor
- Compact design with integrated 30 litre sludge tank
- Automatic activation and emptying of the tank through integrated time control
- Including 3 suction nozzles
- Including 4 m suction hose and 2 m discharge hose

Product Specs:

Power consumption	W	1400
Suction depth max.	m	2
Max. flow rate	l/h	3000
Rated voltage	Hz	220-240V/50 Hz
Warranty		2 years
