TRUE COLOR RGB WITH WARM WHITE AND COOL WHITE LED

1. The light incorporates five basic colors of LED chips: cool white, warm white, red-green-blue (RGB), with high power and constant color rendering over time and temperature.
2. Equipped with state-of-the-art LED technology, E-Lumen X ensures increased energy and luminous efficacy achieving 80 lumens per watt.
3. LED life exceeds 40,000 hours.
4. The innovative design of the diffusion lens and bulb matrix provides exceptional reflection, brightness, throw, and angle of illumination.
5. The perforations on the face ring contribute to the light intensity and angle of illumination by allowing a light penetration throughout.
6. Self determined operation mode with or without Color-Touch controller.
7. Automatic color synchronization among lights and zone.
