

HAILEA AIR STONES

SKU- AS80, AS100, AS120, AS150, ASB20

Hailea offers a variety of air stones designed to enhance oxygenation in aquariums, ponds, and hydroponic systems. These air stones, made from high-quality ceramic materials, produce fine bubbles that improve water aeration, promoting a healthier environment for aquatic life and plant roots.

Product Features:

- **High-Quality Ceramic Construction:** Ensures durability and efficient bubble production.
- **Fine Bubble Diffusion:** Generates fine bubbles to maximize oxygen dispersion in water.
- **Variety of Sizes and Shapes:** Available in multiple dimensions to suit different system requirements.

Specs/ Models:

- **Hailea Round Ceramic Air Stone:** Available in sizes such as 4 inches (100 mm) in diameter, this round air stone is suitable for various applications.
- **Hailea Flat Circular Air Stone:** Offered in sizes like 4 inches, this flat circular design provides stable placement and efficient aeration.
- **Hailea AS-150 Diffuser Air Stone:** Measuring 4 inches in diameter and 0.75 inches thick, this micro-porous ceramic air stone is ideal for aquariums, ponds, and hydroponic systems.

Benefits:

- **Enhanced Oxygenation:** Improves oxygen levels in water, benefiting fish, plants, and beneficial bacteria.
- **Improved Water Circulation:** Promotes uniform nutrient distribution in hydroponic systems.
- **Durable and Low Maintenance:** Constructed for longevity and ease of cleaning.

When selecting a Hailea air stone, consider the size and requirements of your specific system to ensure optimal performance. Proper aeration is crucial for maintaining a healthy aquatic environment and promoting vigorous plant growth in hydroponic setups.
