

FS Series Skimmer

Product details

- Complete set with integrated pump.
- Simple operation.

FS30B

FS40

Floating device makes float above water to operate.

Dirt basket can fill with debris floating above the water. Cotton filter to prevent impurities entering the pump.

Floating cylinder can adjust automatically according to the water level, so as to make the inlet water mainly come from the water surface.

Water outlet of nether cover makes water in which dirt has been removed flow out quickly.

Suggested pond installation
