

POND

RANGE

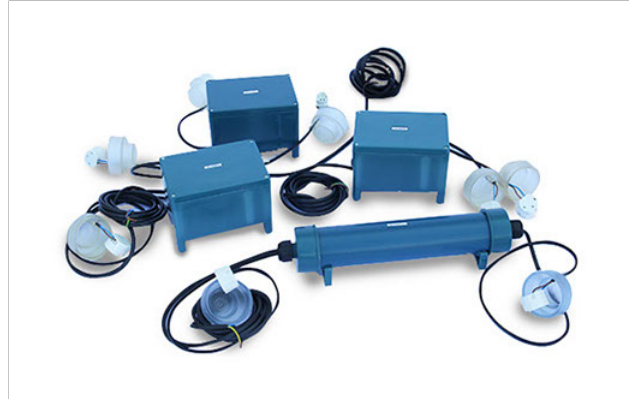

Choice of Unit

We manufacture four UV lights 8,15,30 and 55 watt. The table below provides a guide to the UV you should be using in your pond. The stocking rate of your pond should be taken into account when making your decision which UV light to purchase. A bank of UV's either in series or parallel can be installed on larger ponds.

UV size	Pond Capacity	Max flow per minute
8 watt	6 000 litres	40 l / pm
15 watt	15 000 litres	60 l / pm
30 watt	30 000 litres	140 l / pm
55 watt	50 000 litres	300 l / pm
